PROFESSIONAL SUMMARY

Frontend Developer specializing in the React.js ecosystem, TypeScript, and JavaScript (ES6+), with solid experience in developing scalable web applications, responsive interfaces, and RESTful API integrations. Proven track record spanning everything from designing reusable component architectures to automated deployment (CI/CD). Strong focus on performance, accessibility, and writing clean code, aligned with software engineering best practices and Agile methodologies.

TECH STACK

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.
State Management & Routing: Context API, Redux, React Router.
Backend & Databases: Node.js, Express, MongoDB, Firebase, SQL.
Tools & Infrastructure: RESTful APIs, Unit Testing, CI/CD, Git/GitHub, Vercel, Netlify.
Design & Productivity: Figma, Photoshop, Kanban Methodology, Generative AI.

PROFESSIONAL EXPERIENCE

DevsPro Solution — ReactJS Frontend Developer - *September 2021 – Present*

Frontend Architecture: Engineering and developing full-scale web applications using React.js and TypeScript, ensuring modular and maintainable code.
Componentization & Reusability: Creating highly reusable component libraries, reducing development time for new features while maintaining UI/UX consistency.
API Consumption: Asynchronous integration of RESTful APIs with efficient state management (Context API/Redux) and robust error handling.
DevOps & Deployment: Managing the end-to-end publishing pipeline, from Git version control to deployment and monitoring on platforms like Vercel and Netlify.

Bluez — Junior HTML Developer - *July 2024 – Present*

Template Development: Creating and maintaining complex, responsive email marketing templates using advanced HTML/CSS.
Cross-Compatibility: Ensuring visual consistency and cross-client functionality (Outlook, Gmail, Apple Mail), optimizing load times and campaign click-through rates.

Dimas DevsPro Channel — Content Creator & Developer - *July 2026 – Present*

Tech Education: Producing technical content focused on teaching programming logic, Clean Code best practices, and web development architecture.

EDUCATION

Associate Degree in Systems Analysis and Development — Anhembí Morumbi University
Web Development Program — Rocketseat
